

TFS to Azure DevOps Migration

This engagement offers you Sr. level consultants and architects from Tallan to assist and help you execute migrating from Team Foundation Server (TFS) to Azure DevOps.

3-4 Week Engagement

What to Expect

Tallan will work with your internal teams to create a Azure DevOps migration plan that will be developed during the assessment portion of this implementation. From here we will take that roadmap and start the migration process to Azure DevOps. Upon completion your TFS environment will be fully migrated to Azure DevOps.

During the Engagement

Agenda

- Assess current TFS environment(s)
- Create to be architecture for Azure DevOps with internal teams and key stake holders
- Make a road map to get from TFS to Azure DevOps
- Identify risk and mitigate
- Run test migration in Azure sandbox
- Resolve compatibility issues
- Once approved run final migration
- Performance testing before and after migration

Deliverables

- Documentation of new architecture and roadmap
- Functioning Azure DevOps Environment
- DevOps Pipeline Strategy outline
- Knowledge transfer to internal teams
- Post migration documents
- Post migration Support contract
