

Application Portfolio Assessment

Tallan's Application Portfolio Assessment will help you evaluate an individual application, group of applications, or your entire portfolio, to identify those that are cloud candidates and to develop a migration plan based on your priorities and business goals.

What to Expect

- ✓ Identify an individual application or group of applications you would like to evaluate
- ✓ Install and run UnifyCloud analysis tool to evaluate application(s)
- ✓ Allow the tool to run and collect application data
- ✓ Data analysis and cloud readiness evaluation
- ✓ cloud ready application(s) identification
- ✓ Development of migration plan and roadmap for cloud ready app(s)

During the Engagement

Agenda

Day 1-3

- Discuss Application(s) that you would like to evaluate.
- Review and discuss deployment of the third-party tool to set expectations, timeframe and kickoff schedule.
- Set-up & run UnifyCloud tool to collect data

Day 4-5

- Review and analyze data
- Cloud readiness evaluation
- Identify cloud ready application(s)
- Develop migration plan and road map

Deliverables

- Raw data from third party tool UnifyCloud tool
- Data analysis reports and cloud readiness documentation for application(s)
- Documentation around of recommendations and best practices
- Migration roadmap for application(s)
