# BizTalk Health Check

Whether you are looking to maintain your current BizTalk server, thinking about an upgrade, or considering a migration to the cloud, a BizTalk Health Check is a necessity.
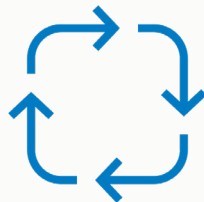

Is your BizTalk platform experiencing slow performance, lack of high availability, and requiring too much attention from your resources? During a healthcheck Tallan will work with your team to understand your goals and review your current infrastructure. You will receive a score card outlining the health of your BizTalk environment including recommended improvements to ensure you are operating at peak performance.

## How Does it Work?

During this session, Tallan's Architects will work onsite and one on one with your team to:

Understand your goals
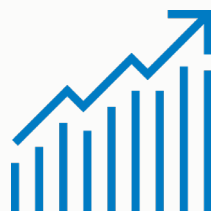

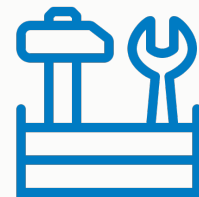

Review your current environment

Complete a Health Check

**You will receive:**

A scorecard outlining the health of your BizTalk environment.

Recommended improvements to ensure you are operating at peak performance.

Our commitment to work with you to implement our recommendations.

# Typical Agenda and Deliverables from a BizTalk Health Check

## Standard Health Check Assessment

| Phase 1 | Phase 2 | Phase 3 | Phase 4 | Phase 5 |
|---|---|---|---|---|
| Discovery & Planning | Compliance | Configuration | Updates and Patches | Data and Reporting |

## Azure Readiness (for migration to Azure only)

| Phase 1 | Phase 2 | Phase 3 |
|---|---|---|
| Discovery & Planning | Information Architecture | Custom Solution Assessment utilizing intelligent cloud assessment tools and Azure Architects |

## Deliverables

- **Discovery & Planning**
    - Review of server and usages
    - Review of BizTalk server architecture
    - Review of BizTalk server event logs (on-prem/cloud environments)
- **Compliance**
    - Server supported limits and thresholds.
    - Identify possible bottlenecks that occur during normal traffic loads and operating hours
- **Configuration**
    - Analyze environment specific BizTalk configurations.
    - Check event logs
- **Updates and Patches**
    - Establish backup, restore, and disaster recovery policies.
    - Review general architecture for server performance and reliability.
    - Evaluate key architectural configurations for fault tolerance, load balancing and deployment.
- **Data & Reporting**
    - Health check data is analyzed and Tallan will provide you and overview and scorecard outlining health of your BizTalk environment.
