

AZURE GOVERNANCE ASSESSMENT

GETTING STARTED

Developing and implementing a standard governance architecture allows you to control Azure costs, manage usage, standardize & monitor the cloud services used across your organization.

GOVERNANCE ENSURES YOUR ORGANIZATION IS:

- Auditing and enforcing your policies for Azure Services
- Creating environments in compliance with external regulations
- Monitoring spend and encouraging accountability throughout your teams

After the assessment you will have an Azure Governance plan outlined and documented to reference and use for implementation across all Azure subscriptions.

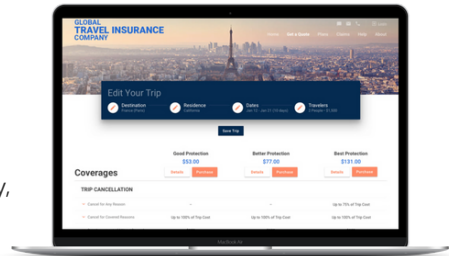

WHAT TO EXPECT

Agenda

- Identify current governance strategy (if applicable) in the current environment
- Map and create governance architecture for Azure
- Educate & discuss Azure Governance tools and best practices
- Develop a migration and implementation plan to move to the proposed governance structure

Deliverables

- Documentation of current governance strategy
- Documentation of proposed Azure Governance architecture
- Training on Azure Governance tools such as Management Groups, Policy, Blueprints, Resource Graph, and Cost Management
- Documented migration and implementation plan

Designing, developing and deploying cloud based applications is on the critical path to digital innovation and modernization.
