

## GETTING STARTED

Aging systems and legacy applications cannot meet today's business goals or customer expectations. Tallan offers App Innovate to help businesses prepare to migrate and modernize their applications to the cloud, through a consultative engagement. Tallan will analyze up to 5 applications and provide recommendations, a reference architecture design, and a modernization plan.

**App Innovate**

Solution Areas  
AppDev, Cloud

Solution Phase  
Strategy

Length of Engagement  
3-6 weeks

### ANALYSIS & PLANNING

We'll analyze your business objectives and supporting data sources to identify "as-is" architecture and 1-5 candidate applications to be modernized. We'll then analyze current applications, environments, data sources, identities, connectivity, and security.

### ARCHITECTURE DESIGN REQUIREMENTS

Working sessions and walkthroughs will help us fully understand applications and the current state of your Azure environment. We'll then design a "to-be" architecture, establish a roadmap for future pilot modernization and begin Azure subscription governance documentation.

### MODERNIZATION PLAN REVIEW

To conclude, we'll share project deliverables in an executive presentation and demonstration, followed up by a discussion regarding a proposed course of action for each application or service.

From workshops, to the entire application development process, we develop software solutions that streamline processes, integrate disparate systems, and help our customers operate more efficiently and profitably. Contact [sales@tallan.com](mailto:sales@tallan.com) to get started!
