

Tallan's DPi30

Tallan's Data Platform in 30 Days will include a design workshop to help your team identify up to 3 scenarios, create a reference architecture design, implement a landing zone and ultimately modernize your data estate using Azure Data Services (ADS).

Deliverables

Design & Model Practices

Through a collaborative workshop approach, we create awareness and envision the role of a modern data and analytics platform for your organization utilizing Azure Services.

Provision Landing Zone

Using a hands-on approach, we help you set a blueprint for your organization to enable the use of Azure Data & Analytics cloud services and future readiness.

Create & Enable Automation

In addition to leveraging ADS to support your scenarios, this program helps your team choose the appropriate automation tooling for their needs.

Phases of the Engagement

In just 30 days, your team will receive a hands-on consulting engagement providing architecture design recommendations for your data estate in Azure to deploy an ADS environment.

Experience Talent-Driven Innovation

Founded in 1985, Tallan provides technology and business process consulting services to enterprise and mid-sized companies, as well as government entities, with a focus on Custom Development, Portals and Collaboration, Business Intelligence, Application Integration, Mobile Platforms, User Experience, Ecommerce, Web Development, and Cloud Services.
